Claims 1-12, 17-41 and 45-49 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-12, 17, 18 and 41, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of "wherein each fiber comprises a plurality of graphemes stacked in a direction that is not perpendicular to an axis direction of each fiber".

With respect to claims 19-40, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of "wherein said step of reducing the difference in characteristic among the plurality of electron-emitting devices comprising a step of emitting an electron from at least one of the plurality of electron-emitting devices under depressurized condition".

With respect to claim 45, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of a method for producing an electron-emitting device, comprising the step of applying a potential higher than a potential applied to the cathode electrode under a depressurized condition to the electrode opposite the cathode electrode, wherein said step of applying the potential to the

Art Unit: 2831

electrode opposite the cathode electrode is a step of increasing a number of emission sites.

With respect to claim 46, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of "wherein said step of reducing comprises a step of emitting electrons from at least one of the plurality of electron-emitting devices under a depressurized condition".

With respect to claims 47 and 48, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of "shifting each electron emission threshold voltage of electron-emitting devices other than the at least one lowest electron-emitting device, so as to become closer to the lowest electron emission threshold voltage, by performing an electron emission from the electron-emitting devices other than the at least one lowest electron-emitting device, under a depressurized condition".

With respect to claim 49, the cited prior art, alone or in combination, does not disclose, teach or suggest the limitation therein of "wherein each fiber comprises a plurality of graphenes which are stacked so as not to be parallel to an axis direction of each fiber".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusi n

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hiroki (US 6,306,001 B1) discloses methods for producing electron-emitting device, electron source, and image-forming apparatus. Okamoto et al. (US Pub. 2001/0006869 A1) disclose a method of fabricating nano-tubes. Saito et al. (US Pub. 2004/0077249 A1) disclose a method and apparatus for carbon fiber fixed on a substrate.
